

Mayflower High School

WHAT WILL I STUDY?

This course is intended for students who did not achieve a grade 4 at GCSE in Year 11.

We will build upon a students' previous knowledge, addressing their weaknesses and building upon students' strengths.

Students will be advised to study Mathematics throughout the year and take their examination when they are ready leading up to June 2020. This will give time to prepare and improve their understanding of Mathematics and provide students with a greater chance of success.

There is no coursework required for Mathematics and students will sit three 1 hour 30 minute exams. One paper will examine non-calculator skills and the other two will examine calculator skills. It is essential that each student has their own calculator and learns how to use it efficiently.

WHAT ARE THE OPPORTUNITIES AFTER A LEVEL?

Mathematics is highly valued as a subject both by employers and as a basis for Higher Education. Most employers require a GCSE in Mathematics at grade 4 or above and all universities do so as well.

WHAT ARE THE COURSE ENTRY REQUIREMENTS?

This is compulsory for all students who attain below a 4 grade in GCSE Mathematics.
